

## John Jairo Celis Restrepo

### Acting Vice President of Power Transmission and Distribution

Trained as an electrical engineer at Universidad de Antioquia, John Jairo Celis Restrepo has been with EPM for over half his life - 33 years of service. The company has seen him grow as a person and professional, holding various positions as engineer, leader and director of teams of people responsible for the day-to-day materialization of projects. These projects not only provide public utilities, but also life and hope to the communities, advocating for quality and safety in the provision of electric power services. He is a person with integrity, transparency, values and solid roots, but also someone whom the trials of life have managed to turn into an adaptable and relentless piece, who is fulfilled in serving. He is characterized by his humility, character to face difficult decisions and the kindness of a noble heart. He gets up every day with conviction and is certain that we can all contribute to building a better country.

He is an Electrical Engineer, Specialist in Telematics and Control, Specialist in Financial Management and Project Management, and Specialist in Energy and Gas Regulation.

He joined EPM in 1990, with experience in Electric Power Generation, Transmission and Distribution Operation and Maintenance, as well as in Substation and Electric Power Line Infrastructure Project Construction Management.

He has held management positions, such as: Head of Operations and Maintenance for the Guatapé Hydroelectric Power Plant, Head of the Energy Production Unit, Head of the STR Project Unit, Director of Centralized Projects, EPM Representative before the National Operation Council (CNO, for the Spanish original) between 2010-2013, Substation and Line Project Manager, and Power T&D Manager (Current). He has participated as an alternate member of the Board of Directors in ESSA, CENS, Afinia and DECA, the EPM Group's Power subsidiaries.
