

Relevant Information

Medellin, March 8, 2019

In relation to the publication made by the web site "www.las2orillas.co", on March 7th 2019, where the progress of the Ituango hydroelectric project was reported indicating: "tranquility for Hidroituango on the issue of insurance policies", we state that to date there is no pronouncement of the insurer on the coverage of the loss due to the collapse of the ADG (Auxiliary Deviation Gallery), under the policy All Risk Construction and Assembly of the Ituango project.

The management of the contingency continues with the exchange of information and analysis, visits to the project, among others, trying to advance in order to obtain in a few months an official pronouncement on that respect. Additionally, the sum that arises does not correspond to reality, the amount of the loss is in the process of adjustment.
