Relevant Information

As provided in number 2 of article 449 of Municipal Ordinance 048 signed by the Medellín Mayor, EPM will undertake the technical, legal, environmental and social studies, among others, as well as any actions necessary to determine viability for its participation in the corporation to be established for building, operating, administering and supporting the Parques del Río project.

"The project Parques del Río Medellín is an integrated and strategic project of urban transformation, public space and mobility that will transform the Medellín River into the environmental and public-space pivot of the city and its region. Its general goal is to enhance the Medellín River as environmental and public-space pivot for the region and the city, optimizing its current function as main mobility axis and turning it into a structuring and integrating element for the different systems of the territory as well as into a central stage for meeting and enjoyment of citizens."
