

## Relevant Information

**EPM awarded completion of the civil works of units 3 and 4 of Hidroituango, which are part of the first stage of the project, to the Colombian firm Schrader Camargo S.A.S.**

The firm Schrader Camargo has extensive experience in executing civil works in hydroelectric projects and will begin works as of December 1.

**Medellín, October 31, 2022.** In order to continue the works of the Ituango Project, EPM entered into a contract with the Colombian firm SCHRADER CAMARGO S.A.S., which was the awarded bidder of contracting process CRW189788 to “Execute the remaining civil works of generation units 3 and 4 and complementary works of the Ituango Hydroelectric Project.” The work consists of executing the remaining concrete for the embedment of turbine number 4, as well as splicing and pouring the concrete in the tunnels that will transport water from the reservoir to generation units 3 and 4.

The latter bearing in mind that the term established in the contract with Consorcio CCC Ituango ends on November 30, 2022, since the Contractor declined EPM’s request to continue under the same unit price system to finish the first stage of the project (units 3 and 4).

It is important to point out that, according to the project’s schedule, units 3 and 4 must become operational before November 30, 2023.

### **Assembly of Units 1 and 2 is Completed**

As EPM announced last week, the civil works and assembly of electromechanical equipment corresponding to units 1 and 2 were properly completed. These two first

turbines are expected to begin providing 600 MW of power by November 30, after the results of all the necessary tests that are currently underway.

### **Contract for the Second Stage of Hidroituango**

Moreover, EPM opened a public request for bids on March 10, 2022, to execute the second stage of the Ituango Project, which comprises units 5 to 8. Ten (10) national and international firms acquired the right to participate in this process. The receipt of bids is on November 4, 2022.
