

## EPM informs the public:

That, in order to promote plurality of participation in the process and in view of the difficulties identified in the insurance market, the closing date for the receipt of bids of the CRW 167467 public application, whose purpose is the construction of the final civil works of the Ituango Hydroelectric Project (generation units 5 to 8), was extended, which was scheduled for this Friday, November 4, 2022.

The deadline was extended by thirty-three (33) calendar days and, therefore, the receipt of bids will be until December 7, 2022, at 4:00 p.m. Addendum No. 9 containing this amendment was sent by EPM's ARIBA contracting system to potential bidders who are participating in this process and was published on the Te Cuento portal on the EPM website [www.epm.com.co](http://www.epm.com.co)
