

Relevant Information

EPM, as the agent of the Company HIDROITUANGO S.A. E.S.P., reports that the National Environmental Licensing Authority (ANLA), by means of Resolution No. 00826 of April 26, 2022, notified electronically on May 4 of that year, resolved to declare the Company HIDROITUANGO S.A. E.S.P. environmentally responsible for the charges formulated through article 1 of Writ No. 2128 of May 8, 2018. The charges consist of failing to implement the environmental management measures established in the License granted to develop the project “Construction and Operation of the Pescadero – Ituango Hydroelectric Power Plant,” related to the management and proper disposition of surplus excavation materials from building the Puerto Valdivia - Presa road. They also consist of having created the La Planta and Cachirimé deposit less than thirty meters from the left margin of the Cauca River. Consequently, the ANLA imposed a fine amounting to FIVE BILLION ONE HUNDRED THIRTY-THREE MILLION ONE HUNDRED THIRTY-FIVE THOUSAND TWO HUNDRED EIGHTY-SIX COLOMBIAN PESOS, LEGAL TENDER (COP 5,133,135,286).

The events that caused the fine, in EPM’s opinion, are the responsibility of a work contractor of the hydroelectric project.

An administrative appeal will be filed considering the resolution, as well as the necessary judicial action.
