

Relevant Information

In relation to the preliminary inquiry opened by the National Authority of Environmental Licenses (ANLA) on the procedures and modifications of the environmental license of the Ituango hydroelectric project, released today by several media, EPM informs that has already been notified of this decision and is attentive to provide all the information required during the development of this investigation.

Additionally, in relation to these same facts, EPM initiated internal investigations on July 27th, as announced to the public opinion at a press conference and in an official communiqué on July 31th, 2018. The company expects that these investigations will promptly show their outcomes.
