

## **EPM clarifies to the public opinion:**

That upon the request made by the Council of Medellín to present the possible financial impacts on the EPM Group in the event of the non-viability of the Ituango hydroelectric project, the company presented to this Corporation the corresponding financial analysis, which do not mean that there are indications with greater probability on that scenario.

In relation to the analysis of the aforementioned scenario, it can be concluded that the EPM Group shows the financial capacity to overcome an eventual infeasibility of the Ituango hydroelectric project, supported mainly by the soundness of current businesses, the assets sale, the displacement of investments in infrastructure and the optimization in costs and expenses.
