

Relevant Information

With respect to information disclosed today by some media,
EPM clarifies:

The EPM Group expects to reach revenues of approximately COP 16 billion, an EBITDA of COP 5 billion and net income of COP 2.2 billion at the end of 2018.

The above, subject to the premises, in terms of the behavior of the energy demand, energy prices, and the macroeconomic scenario, among other variables, are given according to the provisions and if there are no other elements that alter this information.

Likewise, the estimations show that the results will show figures that will allow EPM to transfer to the Municipality of Medellín, during the current administration (2016-2019), a figure higher than COP 4 billion.

The results for the third quarter of 2018 will be released soon.
