

Relevant Information

Medellín, July 27, 2020

Regarding the publication made on the Primerapágina.com portal in its July 24, 2020 edition, EPM clarifies that it corresponds to the information presented to the Medellín Council on Friday, July 24 in a session broadcast live to the public, which does not change compared to what was reported through the mechanism of relevant information from the Financial Superintendence on June 11 and 18, current year, in relation to the schedule of the Ituango Hydroelectric Project.

The above, since the three months announced before the Council and public opinion correspond to the same delay that was reported in the aforementioned reports; which does not represent a legal or material affectation for the company.
