

Relevant Information

Medellín, September 4, 2020

In relation to certain publications circulating in mass media, Empresas Públicas de Medellín E.S.P. hereby informs that it is holding discussions with a financial entity that is a counterparty in debt operations, for the purpose of keeping its contractual relationship normalized through an amendment to the original contract. This is developed amidst a framework dialog and interest on both sides to develop a positive understanding that allows for a long-term business relationship and promotes the institutional development of EPM through the implementation of activities to support the monitoring, analysis and improvement of EPM corporate governance arrangements.

In view of Colombian regulations on public debt, in the event of a contractual adjustment, the Ministry of Finance and Public Credit must approve it as one of the requirements to sign the contract.
